Message from the Editor-in-Chief

It gives me immense pleasure to present the inaugural issue of the *International Journal of Convergent Technologies and Future Systems (IJCTFS)*. This journal is envisioned as a dynamic platform that brings together researchers, academicians, innovators, and practitioners to share their insights on emerging technologies, multidisciplinary research, and futuristic systems shaping the world of tomorrow.

In today's rapidly evolving digital landscape, the convergence of technologies—ranging from Artificial Intelligence, Data Science, and IoT to Sustainable Systems and Smart Infrastructure—has become the foundation of global progress. IJCTFS aims to foster this convergence by promoting scholarly discussions that bridge traditional disciplines and encourage innovative solutions for real-world challenges.

The primary goal of this journal is to provide a forum where knowledge, creativity, and research excellence meet to drive forward-thinking development. It seeks to highlight the significance of multidisciplinary collaboration in building intelligent, resilient, and sustainable systems that will define the future.

This inaugural issue marks a small yet meaningful step in that direction. I express my sincere gratitude to all contributors, peer reviewers, editorial and advisory board members, and well-wishers who have extended their support and scholarly contribution in shaping this maiden volume. Their expertise and commitment have been instrumental in bringing this vision to life.

It is my earnest hope that IJCTFS will inspire innovative thinking, promote research synergy, and serve as a catalyst for technological advancement and academic excellence. I warmly invite researchers, professionals, and readers across disciplines to join us in this journey of innovation, exploration, and futuristic transformation.

With warm regards,

Dr. D. M. Marathe

Founder & Editor-in-Chief
