Message from the Editor-in-Chief

It gives me immense pleasure to present the inaugural issue of the *International Journal of Convergent Technologies and Future Systems (IJCTFS)*. This journal is envisioned as a dynamic platform that brings together researchers, academicians, innovators, and practitioners to share their insights on emerging technologies, multidisciplinary research, and futuristic systems shaping the world of tomorrow.

In today's rapidly evolving digital landscape, the convergence of technologies—ranging from Artificial Intelligence, Data Science, and IoT to Sustainable Systems and Smart Infrastructure—has become the foundation of global progress. IJCTFS aims to foster this convergence by promoting scholarly discussions that bridge traditional disciplines and encourage innovative solutions for real-world challenges.

The primary goal of this journal is to provide a forum where knowledge, creativity, and research excellence meet to drive forward-thinking development. It seeks to highlight the significance of multidisciplinary collaboration in building intelligent, resilient, and sustainable systems that will define the future.

This inaugural issue marks a small yet meaningful step in that direction. I express my sincere gratitude to all contributors, peer reviewers, editorial and advisory board members, and well-wishers who have extended their support and scholarly contribution in shaping this maiden volume. Their expertise and commitment have been instrumental in bringing this vision to life.

It is my earnest hope that IJCTFS will inspire innovative thinking, promote research synergy, and serve as a catalyst for technological advancement and academic excellence. I warmly invite researchers, professionals, and readers across disciplines to join us in this journey of innovation, exploration, and futuristic transformation.

With warm regards,

Dr. D. M. Marathe
Founder & Editor-in-Chief

Index

Sr. No	Paper Title	Page No
1	Climate Change and its Impact on our Environment and Future Generations	01 to 06
2	E-Waste: From Digital Waste to a Circular Economy	07 to 14
3	THE IMPORTANCE OF CIVIC EDUCATION IN DEVELOPING RESPONSIBLE CITIZENS IN INDIA	15 to 20
4	Politics in India: From Elections to Real-Life Public Problems	21 to 27
5	SAFESAN : A DATA DRIVEN SAFETY, HEALTH & DIGNITY MONITORING SYSTEM FOR SEWER AND SANITATION WORKERS	28 to 36
6	Forecasting the Future: An Analytical Study of Predictive Data Models	37 to 42
7	Harvestify Soil Predition (Using Machine Learning)	43 to 48
8	Evaluating Small Open-Source Models, such as Gemma, for Private and Offline AI on Mobile Devices	49 to 54
9	Impact of UPI and Digital Payments On Small Businesses in India	55 to 63
10	Digital Recruitment Fraud Among Students: A Study of Fake Internship and Job Offer Identification	64 to 81
11	DESIGN AND DEVELOPMENT OF A WEB-BASED EMPLOYEE ATTENDANCE MANAGEMENT SYSTEM	82 to 90
12	Student Performance Prediction and Academic Risk Analysis Using Machine Learning	91 to 100
13	THE DUAL EDGE OF DIGITALIZATION: ASSESSING THE DISPLACEMENT AND CREATION EFFECTS OF AI AND AUTOMATION ON INDIA'S	101 to 121
14	Emotion Recognition Using Multimodal AI for Mental Health Monitoring Apps	122 to 136
15	Predictive Analysis of Cybersecurity Risks Through Employee Behavior Modeling	137 to 144
